PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building web applications, from the frontend to REST APIs and databases. During my internship at Brand22, I individually developed an internal CRM and the AI virtual assistant for CIMAT, among other projects. In my own projects, I built complete applications with background processing, subscriptions and automated tests.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, NestJS, REST APIs · **Databases:** PostgreSQL, MySQL

Tools and practices: Git and GitHub, Docker, authentication (JWT), access control (RBAC), automated testing

Also used in projects: Python and FastAPI, PHP · **Working knowledge:** C# and .NET

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Internship) — Brand22

May 2026 – July 2026

Development of web applications and digital solutions for the agency and its clients, across internal and client projects.

Brand22 CRM — client and team management · individual work

- Full-stack development of an internal CRM with a client portal and an employee area for task assignment.
- REST APIs with authentication, role-based permissions and CRUD operations on PostgreSQL.

React · NestJS · TypeScript · Node.js · PostgreSQL

AI virtual assistants for institutional clients — CIMAT and AMAT

- **CIMAT** Live — individually developed the assistant integrated into the website of the Intermunicipal Community of Alto Tâmega and Barroso, connected to the Claude API through a REST API (JavaScript, PHP, HTML, CSS).
- **AMAT** — institutional AI virtual assistant, developed in the same context.

Other work

- Internal domain management application integrated with an external API, with built-in alerts.
- Customer support chatbot for the Brand22 website, plus interfaces, dashboards and features for internal and client projects.

IT Support & Hardware Technician (Internship) — Chip7

April 2025 – July 2025

- Computer assembly, maintenance and repair, including diagnosing and fixing hardware and software faults.
- Technical support for users and system configuration.

PROJECTS

Garimpo — Vinted listing monitoring and alerts

Solo project

- Multi-user application to monitor new listings in the background and send alerts via Telegram, with filters and deduplication.
- Next.js frontend, Python/FastAPI backend and PostgreSQL; authentication and Stripe subscriptions.
- Over 200 automated tests with Pytest; Docker-based environment.

Next.js · Python · FastAPI · PostgreSQL · Stripe · Telegram API · Pytest · Docker

RHNeto Pro — HR Management for Restaurants

Final vocational project (PAP)

- Web application with two user roles, an administration panel and an employee area, and role-based authentication.
- Business logic for attendance, shifts, payroll, tips and holidays, with request approval by the administration.
- Relational database design in MySQL, with tables linked by primary and foreign keys.

HTML · CSS · JavaScript · PHP · MySQL

EDUCATION & CERTIFICATIONS

- **Vocational Course — IT Technician in Management Informatics** — Escola Profissional de Murça, Vila Real · Completed
- **Coursera** — Completed: TypeScript in React · Git for Developers · API Testing with Postman · Introduction to JavaScript. In progress: Meta Full-Stack Developer.
