PROFESSIONAL SUMMARY

Full-Stack Developer who builds web products end to end: React and Next.js interfaces, Node.js and NestJS APIs, and PostgreSQL data models. My work runs in production: an internal CRM used daily by a creative agency and AI assistants on public-sector websites. In my own products I apply server-side business rules, idempotent payments, automated tests and CI on every push.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL
Frontend: React, Next.js, React Native (Expo), HTML, CSS, Tailwind CSS
Backend: Node.js, NestJS, Express.js, FastAPI, REST APIs, WebSockets (Socket.IO)
Databases & ORMs: PostgreSQL, MySQL, Redis · Prisma, Drizzle, SQLAlchemy
Quality & DevOps: automated testing (Vitest, Pytest), CI/CD (GitHub Actions), Docker, Git, Vercel
Security & payments: authentication (JWT), role-based access control (RBAC), Stripe, webhooks

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Brand22 Creative Agency | *May 2026 – July 2026*

Built web applications and AI products for the agency and its clients.

Brand22 CRM — internal client and team management · built individually

- Built the agency's internal CRM end to end: kanban sales pipeline, leads, tasks reviewed between staff and admins, and a token-based client portal for project approval.
- Serverless API on Vercel with MySQL; leads arrive automatically from the agency's WordPress site through a webhook, and a daily scheduled job sends proposal follow-ups by email.

Technologies: React · TanStack Start · TypeScript · Serverless API (Vercel) · MySQL · Resend

AI virtual assistants — CIMAT, AMAT and Brand22 · live on 3 websites

- Built the AI assistant on the official website of CIMAT (an intermunicipal community serving 6 municipalities), plus the AMAT assistant and the Brand22 website chatbot.
- Requests go through a WordPress REST route in PHP, so the AI API key never reaches the browser.

Technologies: JavaScript · PHP · WordPress REST API · Claude API

- Also built an internal domain management tool integrated with an external API, with automatic alerts.

OTHER EXPERIENCE | **IT Support & Hardware Technician — Chip7** | *April 2025 – July 2025*

- Hardware and software troubleshooting and user support.

PROJECTS

Fala Neto — language-learning app with a real-time multiplayer arena · in development · https://github.com/anderson-fullstack-developer/fala-neto

- Turborepo monorepo with an Expo/React Native app, a NestJS API and a web admin panel; real-time matches over Socket.IO.
- Server-authoritative game rules in a shared package, content review workflow with audit log, 114 automated tests in CI.

Technologies: Expo · React Native · NestJS · Socket.IO · PostgreSQL · Prisma · Turborepo

Garimpo — SaaS that turns new marketplace listings into Telegram alerts · https://github.com/anderson-fullstack-developer/garimpo

- Background monitor that batches searches, removes duplicates and backs off on rate limits; Stripe subscriptions.
- 200 automated tests with Pytest, run with lint and the web build in CI.

Technologies: Next.js · Python · FastAPI · PostgreSQL · Stripe · Telegram API · Docker

STP Market — multi-vendor marketplace · https://github.com/anderson-fullstack-developer/stp-market

- Prices recalculated on the server at checkout, idempotent Stripe webhook, stock decremented only after payment, and commission split rounded to the cent.
- 17 automated tests (Vitest) covering checkout, commissions and the webhook, run in CI.

Technologies: Next.js · TypeScript · Prisma · PostgreSQL · Stripe · Clerk · Auth.js

Also: RHNeto Pro — restaurant staff management with a management panel and an employee app (PHP, MySQL, Stripe, SMS).

EDUCATION & CERTIFICATIONS

- **IT Technician in Management Informatics (vocational course)** — Escola Profissional de Murça, Vila Real · Final project: RHNeto Pro, top grade (20/20)
- **Certifications:** CI/CD Pipeline with Docker · Web Application Security Testing (OWASP ZAP) · API Testing with Postman · TypeScript in React · Git for Developers
